ISTQB Foundation Level

DESCRIPTION	TARGET AUDIENCE	PRICE
<p>Software Testing is part of the development life cycle. Testing has become indispensable when it comes to assess the quality of the software product and to help making the right management decisions.</p> <p>The course will provide insight in the fundamentals of testing: what is testing and why should one test, the fundamental test process, what it is and how the different steps in the process map on different software development models. It will also explain the different test levels (or test phases) and test types.</p>	<ul style="list-style-type: none"> - Everyone new to the testing business - Experienced testers who require a theoretical background - Developers interested in testing. - Project leaders/managers requiring more insight in testing - Everyone who wants to prepare for the ISTQB Foundation examination in software testing 	<p>1.275 € (VAT and exam fee not included)</p> <ul style="list-style-type: none"> - Company reduction of 100 € for all participants of the same company from the third subscription. - Company reduction of 200 € for all participants of the same company from the seventh subscription. The test leaders also provide an on-site training at your company from 5 persons onwards. <p>Please contact us for more details.</p>
<p>After this overview of the fundamental test process, techniques will be presented on how to perform static and dynamic testing. These techniques are useful for both the developer and the tester.</p> <p>Some objectives for test management will be presented, covering topics like organising your testing and test team, planning the test process, monitoring and controlling the progress and reporting about these. It will also give some background on risks and how to control them.</p> <p>And to conclude, an overview of different test tools will be provided, with benefits and risks and a way to introduce such a tool into an organisation.</p> <p>Please note that this course does not focus on a specific project (Prince2, PMP,...), development (RUP, XP, DSDM,...) or test (TMap, TestFrame, STBox, Testing Intelligence™,...) methodology, the principles taught here can be applied to any existing methodology.</p>	<p>COURSE OUTLINE</p> <p>The course is structured the same way as the ISTQB Foundation syllabus and the ISTQB Foundation book. This way the students are able to relate the topics covered in the course to both the syllabus and the book.</p> <p>Course outline:</p> <ul style="list-style-type: none"> - Introduction to software testing. - Fundamental test process & psychology of testing. - Testing identified within different software development models & maintenance testing. - Reviews and static analysis tools. - Black box, white box and experience based test design techniques. - Test management: organising, estimating, planning and controlling your test process. - Tool support: how can tools support your test process. 	<p>INVOICING</p> <p>An invoice will be sent to the invoicing contact of your organisation. The invoice should be paid upfront.</p>
<p>Optionally, the exam can be taken at the end of the third course day for an additional fee of 195 € to cover the costs for the exam itself and its administration. Alternatively, a computer-based exam can be scheduled on a date and location of choice through www.2test.com.</p>	<p>EXAM</p>	<p>SUBSCRIPTION</p> <p>Please send an e-mail to training@thetestleaders.com providing the following information:</p> <ul style="list-style-type: none"> - name(s) of the students along with the indication whether or not they will take the exam; - e-mail address of the students; - company VAT number; - invoicing address; - invoicing contact person. <p>The attendance of the students will be reserved as soon as the invoice is paid. Students will receive a personal invitation with practical details on the course on the e-mail address provided in the subscription mail.</p> <p>We have set the maximum number of course participants to 12 to be able to answer questions and provide guidance during practical work.</p>

CANCELLATION

If you cancel your subscription:

- until two weeks in advance: the amount will be refunded entirely;
- from 2 weeks in advance of the course: 250 € of the invoice amount will be subtracted (including the full amount of the optional exam fee)

QUESTIONS

If this course flyer does not provide you with enough information and the website www.istqb.org does not answer all of your questions, please do not hesitate to contact us for more information. We will be happy to answer all of your questions.

ABOUT THE TEST LEADERS

The test leaders is an ICT company, delivering expert test leading solutions and services. The test leaders' mission is to reduce its clients' technical and business risks, by leading test projects based on an own proven risk based test methodology, testing intelligence™. For over 15 years the test leaders manage test projects in 4 different domains:

- Finance
- Logistics/Automotive
- Telecom
- HR/Interim

They combine their broad experience in testing with common sense and a down-to-earth attitude, supported by an efficient, truly risk-based model, testing intelligence™, facilitating test leaders to perform their activities in various types of projects:

- Tailor-made software solutions
- Package implementations (COTS)
- Classical, Iterative and Agile projects
- Functional and business projects
- Infrastructure projects

The test leaders manage your risks and help you to ensure your business goals.

Using practical examples during the course, the participants will understand the theory much better and the gained knowledge will enable the participants to interact with the tutors.

This training ISTQB Certified Tester Foundation Level (CTFL) is accredited by ISTQB. The test leaders are able to organise the exam corresponding to this course.
